## RESEARCH INTERNSHIP – Fall/Winter 2015

### Mobilising the financial sector on climate change

**When?** September 1<sup>st</sup>, for 3-6 months, full time  
**Where?** In our Paris office (75009)  
**What?** Research internship, good remuneration (≈ 1.000€ before tax)

#### Who we are The 2° Investing Initiative

---

The 2° Investing Initiative [2°ii] is a dynamic think tank working to **align the financial sector with 2°C climate goals**. Our research and advocacy work seeks to:

- Align investment processes of financial institutions with 2°C climate scenarios;
- Develop the metrics and tools to measure the climate performance of financial institutions;
- Mobilize regulatory and policy incentives to shift capital to energy transition financing.

The association was founded in 2012 in Paris and has a branch in New York and an office in London since 2015. Our work is global, both in terms of geography and engaging key actors. We bring together financial institutions, issuers, policy makers, research institutes, experts, and NGOs to achieve our mission. Representatives from all of the key stakeholder groups are also sponsors of our research.

More information can be found online on: <http://www.2degrees-investing.org/>

#### Our needs Your objectives

---

Your main task will be to perform research work in a new and challenging field: the development of a new generation of metrics to measure the climate performance of financial portfolios. Research work includes desk research, conducting interviews, contributing to our studies, setting workshops, attending and summarizing conferences.

You will have a chance to work on an international research project commissioned by the European Commission. You will also have the opportunity to participate in several conferences and events related to climate finance during the COP21 Summit at the end of the year. You will be closely managed by one of our research analysts.

#### What we are looking for Your profile

---

- Excellent degree in relevant topics (incl. Master of Finance, Economics, Grandes Ecoles)
- Very good level of understanding of market finance and banking, interest in issues related to climate change
- Excellent written and verbal skills in English, very good knowledge in French
- Work or internship experience in finance (bank, asset management, insurance) a plus
