

## PROJECT MANAGER

### THE ORGANIZATION

The 2° Investing Initiative [2°ii] is the leading think tank on integrating climate-related objectives into financial market metrics, processes, and regulation. Our mission is to align the financial markets with the goals of the Paris Agreement. The association was founded in 2012 in Paris, and now employs 30 people based in New York, Berlin, London and Geneva. All entities of the group are non-for-profit, the US entity is a 501c3.

Our work is global, both in terms of geography and engaging key actors. Our specificity is to be vertically integrated: we design the public policies, the standards, the data and tools that enable the implementation of our recommendations, and directly provide them for free to financial institutions and regulators. Our team include policy analysts, software engineers, data scientists and business consultants.

2°ii is notably know from having introduced climate-scenario analysis for investment and lending portfolios. Our approach has been adopted and endorsed by authorities (France, Switzerland), financial supervisors (California, Europe) and various investors associations. It is now used by hundreds of financial institutions and the leading financial supervisors.

2°ii research has also triggered the obligation for financial advisors based in Europe to address the 'non-financial' investment objectives of their retail clients. In the next few years, we will invest in the implementation of this reform in Europe and its exportation in other jurisdictions. Our work notably involves policy research, legal analysis, behavioral science research, database and software development.

### JOB DESCRIPTION: PROJECT MANAGER, SUSTAINABLE FINANCE

As project manager, you will lead the development of a 1-3 year international project, related to climate-related analysis, or integration of sustainability preferences in retail financial products design and distribution (depending on your experience).

The work will involve:

- Ensuring the production of deliverables (e.g. research papers, events, database and software);
- Managing the team mobilized on the project (1 to 3 analysts / data scientists / software developers);

205 East 42nd Street, 19th Floor  
New York, New York 10017  
(917) 325 6312

- Engaging with key stakeholders (financial institutions, policy-makers, financial supervisors);
- Representing the group in conferences, roundtables, expert committees, etc.

We are looking for candidates with 5-10 years of experience or more in project management, with experience in finance and sustainability issues. Experience in consulting is a plus.

You will work from our New York Office (Grand Central), with travel opportunities in Europe. We offer a competitive salary and the opportunity to develop visibility and personal network among large financial institutions and key influencers on an emerging topic.

Please send your application (CV and cover letter in English indicating your earliest possible start date) to: [jobs@2degrees-investing.org](mailto:jobs@2degrees-investing.org)

We are committed to building a diverse team and encourage applications from female and minority candidates. Valid authorization to work in the US is a pre-requisite.
