

# Questionnaire for assessing client sustainability preferences and motivations

For use with the accompanying guidance

# About

The 2° Investing Initiative (2DII) is an international, non-profit think tank working to align financial markets and regulations with the Paris Agreement goals.

Working globally with offices in Paris and New York, 2DII coordinates some of the world's largest research projects on climate metrics in financial markets. In order to ensure our independence and the intellectual integrity of our work, we have a multi-stakeholder governance and funding structure, with representatives from a diverse array of financial institutions, regulators, policymakers, universities and NGOs.

# I: Summary

## Background

- (1) Investment firms providing financial advice and portfolio management should carry out a mandatory assessment of sustainability preferences of their clients or potential clients. Investment firms should then take these sustainability preferences into account in the selection process of financial instruments that are recommended to those clients.
- (2) 2DII has developed this Questionnaire for assessing client sustainability preferences (the **Questionnaire**) to assist investment firms carry out a comprehensive assessment of a client's sustainability preferences and wider sustainability motivations and harmonise practice among investment firms. 2DII believes that all of these aspects are critical to improving the suitability of the recommended product(s), increasing consumer trust, and ensuring that financial markets work towards societal and environmental goals.
- (3) The Questionnaire and Guidance were developed by 2DII taking into account (i) relevant regulatory framework (ii) 2DII expertise and research in relation to the assessment of sustainability preferences of retail clients (iii) discussions of a working group composed of around 20 members (representants of major stakeholders of sustainable finance in France including financial institutions, NGOs and academics) in the framework of Finance ClimAct project and (iv) feedbacks received on a European public consultation on a draft Questionnaire and Guidance opened by 2DII from March 2022 to June 2022.

## Overview

- (4) The Questionnaire should be read together with the accompanying Guidance for assessing client sustainability preferences (the **Guidance**). Taken together, the Questionnaire and the Guidance support investment firms ensure legal compliance with the new requirements regarding integration of client sustainability preferences to the suitability assessment<sup>1</sup>.
- (5) Given the continually evolving nature of sustainable finance approaches and client expectations regarding sustainability aspects of their investments, the Questionnaire and the Guidance also support investment firms implement better practice than currently required by the regulatory framework and avoid certain risks and pitfalls.

## Scope

- (6) The Questionnaire and the Guidance relate to the provision of investment advice and portfolio management and principally address situations where these services are provided to retail clients.
- (7) The Questionnaire and the Guidance relate to the following requirements for the suitability assessment:
  - a) Directive 2014/65/EU<sup>2</sup> (**MiFID II**)

---

<sup>1</sup> Commission Delegated Regulation (EU) 2021/1253 of 21 April 2021 amending Delegated Regulation (EU) 2017/565 as regards the integration of sustainability factors, risks and preferences into certain organisational requirements and operating conditions for investment firms

<sup>2</sup> Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Directive 2002/92/EC and Directive 2011/61/EU

- b) Commission Delegated Regulation (EU) 2017/565<sup>3</sup> (**MiFID II Delegated Regulation**) (as amended by Commission Delegated Regulation (EU) 2021/1253<sup>4</sup>)
  - c) ESMA Guidelines on certain aspects of the MiFID II suitability requirements (**ESMA Guidelines**)<sup>5</sup>.
- (8) Unless otherwise specified, terms used in MiFID II and the MiFID II Delegated Regulation have the same meaning in the Questionnaire and the Guidance. Recognising that the Questionnaire and the Guidance also support investment firms implement better practice than currently required by the regulatory framework, the word 'should' is often used (rather than words such as 'shall', 'must' or 'required to' which are more relevant for mandatory obligations). In addition, the following interpretive principles should be adopted:
- a) 'I' refers to the investment firm which is carrying out the suitability assessment
  - b) 'you' refers to the client or potential client
  - c) 'client' refers to client or potential client as applicable
- (9) The Questionnaire and the Guidance focus only on the assessment of client sustainability preferences during the suitability assessment and not to the assessment of traditional investment objectives such as time horizon, risk appetite etc.
- (10) While the Questionnaire and the Guidance are only focussed on the requirements for the suitability assessment articulated under MiFID II, the content could also be useful to the assessment of sustainability preferences now required under Directive 2016/97/EU (**IDD**)<sup>6</sup>.

#### **Disclaimer**

*The Questionnaire and the Guidance are produced by 2DII in the context of a French multistakeholder working group funded by the European Commission. Both documents relate to EU level regulation and guidance and do not cover any national level regulation or guidance that may have been published in any member state in relation to the integration of sustainability preferences of clients to the suitability assessment.*

*Neither document is endorsed by financial regulators or supervisory authorities at National or European level. In addition, the Questionnaire and the Guidance include content which in the opinion of 2DII supports investment firms implement better practice than currently required by the regulatory framework. However, investment firms must independently satisfy themselves that they have complied with the overarching duty to act in the best interests of the client (Art 24, MiFID II).*

*It is important to note that better practices put forward in the Questionnaire and Guidance should not be confused with binding rules or even soft law issued by legislators and regulators. They are advice expressed by 2DII based on their research on sustainable finance and retail investor preferences.*

3 Commission Delegated Regulation (EU) of 25 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council as regards organisational requirements and operating conditions for investment firms and defined terms for the purposes of that Directive

4 Commission Delegated Regulation (EU) 2021/1253 of 21 April 2021 amending Delegated Regulation (EU) 2017/565 as regards the integration of sustainability factors, risks and preferences into certain organisational requirements and operating conditions for investment firms

# 2: Using the Questionnaire and the Guidance

## How to use the Questionnaire

- (11) The Questionnaire guides an investment firm through the part of the suitability assessment related to assessing client sustainability preferences and wider sustainability motivations. Wider sustainability motivations are not addressed by the regulatory concept of client sustainability preferences; however, we believe they are relevant to implement better practice for a comprehensive assessment of all sustainability related aspects associated with client investments.
- (12) This Questionnaire focusses on questions related to sustainability aspects of the suitability assessment and should be integrated to the investment firm suitability questionnaire. Questions related to sustainability are currently considered by the legislator and the regulator as a top up to the assessment of traditional investment objectives, therefore, they should be addressed after questions related to traditional investment objectives.
- (13) The Questionnaire is structured around the following process.

- (14) Each section of the Questionnaire articulates what is required for investment firms to:
- Step 1: Explanation of sustainability preferences:** Explain the different categories of sustainability preferences and additional concepts (such as ESG aspects) to provide sufficient information to enable the client to make an informed decision about his or her sustainability preferences and wider sustainability motivations.
  - Step 2: Identification of client sustainability preferences:** Ask the right questions to comprehensively assess the client's sustainability preferences and wider sustainability motivations.
  - Step 3: Financial product recommendation:** Use the information revealed by the client to make a financial product recommendation.
- (15) The Questionnaire provides a mean to record information to demonstrate that relevant actions have been completed and document key information about a client's sustainability preferences and wider sustainability motivations. In particular, investment firms providing investment advice need to provide a report to the client that outlines the advice. The report should identify why the recommendation provided is suitable including how the recommendation meets the client's investment objectives, his or her

personal circumstances, the client's knowledge and experience, the client's attitude to risk his or her capacity to sustain losses and his or her sustainability preferences.

- (16) A pure focus on the regulatory concept of sustainability preferences may not cover wider sustainability motivations or capture all the granular aspects of how some clients want to invest their money. The Questionnaire and the Guidance are structured so that there is a clear distinction between (1) requirements to meet the threshold for regulatory compliance for assessing client sustainability preferences and (2) steps to assess wider sustainability motivations (not addressed by the regulatory concept of client sustainability preferences) which are relevant to implement better practice for a didactic and comprehensive assessment of all sustainability related aspects associated with client investments.

*Investment firms are encouraged to use all parts of the Questionnaire. However, for those investment firms choosing to comply with the bare minimum legal requirements, these are indicated in the Questionnaire in orange text and with the following symbol:*

*For firms choosing to go beyond MIFID II requirements and assess wider sustainability motivations of clients, we advise to integrate at the beginning of the questionnaire a disclaimer regarding the assessment of wider sustainability motivations, indicating that the firm will use its best efforts to match the client's wider sustainability motivations, but accept no actual responsibility or liability whatsoever if the financial products advised don't comply with the client's expectations beyond MIFID II and MIFID II Delegated Regulation requirements.*

- (17) Some clients may have no interest in sustainability preferences or wider sustainability motivations for their investments. The Questionnaire accommodates different levels of interest in sustainability preferences and wider sustainability motivations through introducing three levels of assessment in *Step 2: Identification of client sustainability preferences*:
- Short Assessment (around 5 minutes):** If having provided an explanation of sustainability preferences as per *Step 2: Identification of client sustainability preferences*, the client does not have any interest in sustainability at the end of the Short Assessment, then no further assessment of sustainability preferences is necessary, and the investment firm can proceed to *Step 3: Financial product recommendation*.
  - Medium Assessment (around 10 to 15 minutes):** If at the end of the Short Assessment, the client expresses any interest in sustainability or a need for further information, the investment firm should proceed to the Medium Assessment which focusses on assessing sustainability preferences and wider sustainability motivations for the client. At the end of the Medium Assessment the client is asked if he or she wants to provide more detailed information on specific values or priorities. If the client does not wish to provide more detailed information, then no further assessment of sustainability preferences and wider sustainability motivations is necessary, and the investment firm can proceed to *Step 3: Financial product recommendation*.
  - Long Assessment (a minimum of 15 minutes):** If at the end of the Medium Assessment the client wants to provide more information on specific values and priorities, the investment firm should proceed to the questions in the Long Assessment which relate to values and priorities. Following this assessment, the investment firm can then proceed to *Step 3: Financial product recommendation*.
- (18) The left column of the Questionnaire focuses on the substantive content for the assessment of suitability preferences and motivations and provides a means to record relevant actions have been completed and record key information necessary for making a financial product recommendation. The right column of the Questionnaire includes hints and tips for the investment firm on how to complete the Questionnaire and links to the relevant sections of the Guidance for more information and support.

# Questionnaire

**Disclaimer regarding the assessment of wider sustainability motivations**

This questionnaire aims to assure legal compliance with requirements regarding integration of client sustainability preferences to the sustainability assessment in accordance with the Directive 2014/65/EU (MIFID II) and the Commission Delegated Regulation (EU) 2017/565 (MIFID II Delegated Regulation) (as amended by Commission Delegated Regulation (EU) 2021/1253).

Given the continually evolving nature of sustainable finance approaches and general clients' expectations regarding sustainability aspects of their investments we have decided to use this questionnaire which inserts distinction between (i) requirements to meet the threshold for MIFID II and the MIFID II Delegated Regulation compliance and (ii) steps to assess wider sustainability motivations beyond MIFID II and MIFID II Delegated Regulation requirements.

**As investment firm we have to comply with the binding rules of namely MIFID II and MIFID II Delegated Regulation. The complementary steps we have included in the questionnaire aim to implement more thorough practices than those currently required by the regulatory framework and help clients to invest in products which comply with their wider sustainability motivations. As for these complementary steps do not constitute a binding rule, we will use our best efforts to match the client's wider sustainability motivations, but we accept no actual responsibility or liability whatsoever if the financial products we have advised don't comply with the client's expectations beyond MIFID II and MIFID II Delegated Regulation requirements.**

## Step 1: Explanation of sustainability preferences

<p>Explanation to be provided by the investment firm to all clients:</p> <ul style="list-style-type: none"> <li>• Introductory explanation on the links between financial investment and the environment and society.</li> <li>• Explanation on what environmental, social and governance aspects mean.</li> <li>• Explanation on the different types of sustainable financial instruments available on the market.</li> <li>• Explanation of the different categories of sustainability preferences.</li> <li>• Articulation between sustainability preferences and other investment objectives.</li> </ul> <p>To be completed by the investment firm:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> I have enquired about the client's level of financial literacy and knowledge of sustainability issues.</li> <li><input type="checkbox"/> I have provided an explanation of sustainability preferences to enable the client to understand the different degrees of sustainability which are possible for financial instruments and explained environmental, social and governance aspects.</li> <li><input type="checkbox"/> In my explanation of sustainability preferences, I used the following client explanatory materials: .....</li> </ul>	<p>The investment firm has an obligation to explain the different categories of sustainability preferences. Firms should also explain what environmental, social and governance aspects mean. </p> <p>This is a preliminary explanation to provide sufficient information to enable clients to take informed decisions and advocate effectively in relation to their own sustainability preferences.</p> <p>The explanation of sustainability preferences and additional aspects should be based on the client explanatory materials used by the investment firm. Annex 1 of the Guidance articulates key considerations and content which needs to be included in the client explanatory materials to ensure that the explanation of sustainability preferences is effective.</p>
--	---

## Step 2: Identification of client sustainability preferences

### Short Assessment

<p>Q1. Do you have sustainability preferences for your investment?</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> a) Yes</li> <li><input type="checkbox"/> b) Don't know, need to hear more about it</li> <li><input type="checkbox"/> c) No, only care about financial aspects of the investment</li> </ul>	<p style="text-align: right;"></p> <p>The investment firm has an obligation to assess if the client has sustainability preferences for his/her investment.</p> <p style="text-align: right;"></p>
---	--

#### End of Short Assessment

If the client answers "c) No, only care about financial aspects of my investment" in Q1 then proceed to Step 3: Financial product recommendation.

If the client answers otherwise, proceed to Q2. In case the client answers "b) Don't know, need to hear more about it", please note that further information will be provided along with Q3 and Q4. The investment firm should clarify the explanation then.

## Medium Assessment

<p>Q2. How would you express your sustainability motivations and preferences in your own words?</p> <p><input type="checkbox"/> Answer: .....</p> <p><input type="checkbox"/> Don't know yet</p>	<p>Assessing sustainability preferences and motivations of the client without providing a pre-defined framework will reduce risk of bias.</p>
<p>Q3. What do you want to achieve?</p> <p><i>(Please select one or several sustainability goals. If you have several sustainability goals, please rank them from 1 to 3, 1 being the most important)</i></p> <p><input type="checkbox"/> Want to have a clear positive impact on the society and/or the environment with the investment</p> <p><input type="checkbox"/> Want to align investments with personal values</p> <p><input type="checkbox"/> Want to invest in products which integrate ESG risks and opportunities<sup>7</sup></p>	<p>Annex I of the Guidance contains information on explanations to be provided to the client on sustainability goal(s).</p> <p>The overall strategy of the product should be consistent with the sustainability goal(s) of the client.</p>
<p>Q4. In which type of economic activity would you be willing to invest your money? </p> <p><i>(If you select several answers, please provide a ranking from 1 to 3, 1 being the most important)</i></p> <p><input type="checkbox"/> a) Economic activities that contribute substantially to the following environmental objectives:</p> <ul style="list-style-type: none"> <li>• Climate change mitigation</li> <li>• Climate change adaptation</li> <li>• Sustainable use and protection of water and marine resources</li> <li>• Transition to a circular economy</li> <li>• Pollution prevention and control</li> <li>• Protection and restoration of biodiversity and ecosystems</li> </ul> <p>It should represent a minimum of ..... % of the investment <i>(please pick a percentage between 25%, 50%, 75% or 100%)</i></p> <p><input type="checkbox"/> b) Economic activities that contribute to environmental objectives (such as efficient use of energy, renewable energy, raw materials, water...) or social objectives (such as tackling inequality or fostering social cohesion, social integration and labour relations...).</p> <p>It should represent a minimum of ..... % of the investment <i>(please pick a percentage between 25%, 50%, 75% or 100%)</i></p> <p><input type="checkbox"/> c) Economic activities that do not aim at contributing to any environmental or social objective but only consider negative</p>	<p>The investment firm has an obligation to explain the different categories of sustainability preference and assess client sustainability preferences. </p> <p>Annex I of the Guidance contains information on further explanations to be provided on sustainability preferences.</p>

<sup>7</sup> A significant number of investors think integrating ESG risks and opportunities leads to increased risk adjusted return. Currently not all financial products integrate ESG risks and opportunities. Therefore, investment firms should identify clients who want to integrate ESG risks and opportunities in their investment to recommend suitable products. This goal could become irrelevant if all financial products would integrate ESG risk and opportunities.

<p>effects on environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters.</p> <p><b>For c), please pick the categories of indicators on negative effect to be considered</b> <i>(If you select several answers, please provide a ranking, 1 being the most important)</i></p> <p>Negative effects of the investee companies:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Greenhouse gas emissions</li> <li><input type="checkbox"/> Effect on biodiversity</li> <li><input type="checkbox"/> Emission to water</li> <li><input type="checkbox"/> Waste</li> <li><input type="checkbox"/> Social and employee matters</li> </ul> <p>Negative effects of the investee countries:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> GHG intensity</li> <li><input type="checkbox"/> Countries subject to social violation</li> </ul> <p>Negative effects of the investee real estate assets:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Exposure to fossil fuels through real estate assets</li> <li><input type="checkbox"/> Exposure to energy-inefficient real estate assets</li> </ul> <p>Other<sup>8</sup>:.....</p> <p><b>For c), please pick the way to use the indicators of negative effects selected above</b> <i>(If you select several answers, please provide a ranking, 1 being the most important)</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> <b>Exclude</b> investments showing high negative effects based on family of indicators selected</li> <li><input type="checkbox"/> <b>Engage</b> to reduce bad practices of investments showing high negative effects based on family of indicators selected (voting or engagement strategies)</li> <li><input type="checkbox"/> <b>Other</b>:.....</li> </ul>	
<p><b>Q5. Do you want to provide more detail regarding your values and priorities?</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> a) Yes</li> <li><input type="checkbox"/> b) No</li> </ul>	

**End of Medium Assessment**

If the client answers “b) No” in Q5 then proceed to Step 3: Financial product recommendation. If the client answers otherwise, proceed to Q6.

---

<sup>8</sup> The values and priorities lists in the long assessment can help to define other negative effects topics

## Long Assessment

Values and priorities	
<p>Q6. Which of the Sustainable Development Goals below do you want to advance with your investments? <i>(If you select several answers, please provide a ranking, 1 being the most important)</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Environment matters <ul style="list-style-type: none"> <li><input type="checkbox"/> Clean water and sanitation</li> <li><input type="checkbox"/> Affordable and clean energy</li> <li><input type="checkbox"/> Sustainable cities and communities</li> <li><input type="checkbox"/> Responsible consumption and production</li> <li><input type="checkbox"/> Climate action</li> <li><input type="checkbox"/> Water quality and fish stocks</li> <li><input type="checkbox"/> Nature conservation and biodiversity</li> </ul> </li> <li><input type="checkbox"/> Social &amp; governance matters <ul style="list-style-type: none"> <li><input type="checkbox"/> No poverty</li> <li><input type="checkbox"/> Zero hunger</li> <li><input type="checkbox"/> Good health and well-being</li> <li><input type="checkbox"/> Quality education</li> <li><input type="checkbox"/> Gender equality</li> <li><input type="checkbox"/> Decent work and economic growth</li> <li><input type="checkbox"/> Sustainable industry, infrastructure and innovation</li> <li><input type="checkbox"/> Reduce inequalities</li> <li><input type="checkbox"/> Peace, justice and strong institutions</li> </ul> </li> <li><input type="checkbox"/> All environment, social &amp; governance matters</li> </ul>	<p>This question enables better understanding of the values and priorities of the client and can help you better define the product recommendation.</p> <p>The specification of certain SDG(s) can be particularly relevant for clients who selected sustainable preference category b) or who selected sustainable preference category c) plus engagement in Q4.</p>
<p>Q7. Do you refuse to be financially exposed to the following economic activities? <i>(If you select several answers, please provide a ranking, 1 being the most important exclusion)</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Environment exclusions <ul style="list-style-type: none"> <li><input type="checkbox"/> Pesticides and biocides</li> <li><input type="checkbox"/> Animal testing</li> <li><input type="checkbox"/> Genetic engineering</li> <li><input type="checkbox"/> Palm oil</li> <li><input type="checkbox"/> Coal</li> <li><input type="checkbox"/> Oil</li> <li><input type="checkbox"/> Nuclear energy</li> <li><input type="checkbox"/> Gas</li> <li><input type="checkbox"/> Fur</li> <li><input type="checkbox"/> Factory farming</li> </ul> </li> <li><input type="checkbox"/> Social and ethics exclusions <ul style="list-style-type: none"> <li><input type="checkbox"/> Weapons and/or armament</li> <li><input type="checkbox"/> Tobacco products</li> <li><input type="checkbox"/> Alcohol</li> <li><input type="checkbox"/> Gambling</li> <li><input type="checkbox"/> Pornography</li> <li><input type="checkbox"/> Research on human embryos</li> </ul> </li> <li><input type="checkbox"/> Breach of international norms: <ul style="list-style-type: none"> <li><input type="checkbox"/> Violation of the principles of the UN Global Compact (Human Rights, Labour, Environment, Anti-Corruption)</li> </ul> </li> </ul>	<p>This question enables better understanding of the values and priorities of the client and can help you better define the product recommendation.</p> <p>The specification of certain exclusion criteria can be particularly relevant for clients who selected sustainable preference category c) plus exclusion in Q4.</p>

<ul style="list-style-type: none"> <li><input type="checkbox"/> Violation of OECD guidelines for multinational enterprises (Responsible business conduct)</li> <li><input type="checkbox"/> Violation of International Labour Organisation rules</li> <li><input type="checkbox"/> Don't refuse financing any sector</li> </ul>	
<p>Q8. Do you refuse to be financially exposed to economic activities in countries with following controversies? <i>(If you select several answers, please provide a ranking, 1 being the most important exclusion)</i></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Nuclear weapons</li> <li><input type="checkbox"/> Non-proliferation treaty of nuclear weapons</li> <li><input type="checkbox"/> Countries classified as not free</li> <li><input type="checkbox"/> Corruption</li> <li><input type="checkbox"/> Death sentence</li> <li><input type="checkbox"/> Wars</li> <li><input type="checkbox"/> Non-ratification of Paris-Agreement</li> <li><input type="checkbox"/> Don't refuse being financially exposed to economic activities in any countries</li> </ul>	<p>This question enables better understanding of the values and priorities of the client and can help you better define the product recommendation.</p> <p>The specification of certain exclusion criteria can be particularly relevant for clients who selected sustainable preference category c) plus exclusion in Q4.</p>
<p>Q9. Are there any additional values and priorities you would like to express?</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> a) Yes <i>(please express your additional values and priorities):</i> .....</li> <li><input type="checkbox"/> b) No</li> </ul>	<p>This question enables better understanding of the values and priorities of the client and can help you better define the product recommendation.</p>

## Step 3: Financial product recommendation

<p><b>Outcome 1: Financial product(s) meeting sustainability preferences and wider sustainability motivations</b></p>	
<p><i>To be completed by the investment firm:</i></p> <p>Q10. I recommended the following financial instrument(s): </p> <p>.....</p> <p>The recommended financial instrument(s) meet(s) the sustainability preferences required by the client (in Q4) because:</p> <p>.....</p> <p>IN ADDITION</p> <p>The recommended financial instrument(s) also meet(s) wider sustainability motivations (in Q2, Q3 and Q6 to Q9) defined by the client because:</p> <p>.....</p>	<p>The investment firm has an obligation to explain why a recommended financial instrument meets the client's sustainability preferences and to provide a report to the client including these reasons. </p> <p>Provided that a financial instrument satisfies the sustainability preferences of a client, investment firms should as far as possible also seek to ensure the financial instrument also satisfies any wider sustainability motivations. Please refer to Annex II of the Guidance to have more information on how to consider sustainability preferences, goals, values and priorities of the client in the product recommendation.</p>
<p><b>Outcome 2: Financial product meeting sustainability preferences but not wider sustainability motivations</b></p>	

<p><i>To be completed by the investment firm:</i></p> <p><b>Q11. I recommended the following financial instrument(s):</b> </p> <p>.....</p> <p>The recommended financial instrument(s) meet(s) the sustainability preferences required by the client (in Q4) because:</p> <p>.....</p> <p><b>IN ADDITION</b></p> <p>However, the recommended financial instrument(s) does/do not meet all the wider sustainability motivations (in Q2, Q3 and Q6 to Q9) defined by the client because:</p> <p>.....</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> I have informed the client that a financial instrument which also meets the client’s wider sustainability motivations may be available elsewhere on the market.</li> <li><input type="checkbox"/> I have informed the client of online platforms which compare the sustainability features of different financial instruments<sup>9</sup>.</li> <li><input type="checkbox"/> I asked the client if he or she prefers to adapt his or her sustainability motivations or prefer to find alternative investment solutions.</li> </ul> <p><b>AS A RESULT:</b></p> <p><b>EITHER</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The client decides to accept the recommended financial instrument(s) through adapting the following sustainability motivations:</li> </ul> <p>.....</p> <p><b>OR</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The client decides to look for alternative investment solutions.</li> </ul>	<p>The investment firm has an obligation to explain why a recommended financial instrument meets the client’s sustainability preferences and to provide a report to the client including these reasons. </p> <p>Where a financial instrument meets sustainability preferences of a client but not wider sustainability motivations, the financial instrument may still be recommended but the investment firms should inform the client of the criteria which are not satisfied and that a financial instrument which does satisfy these criteria may be available elsewhere.</p> <p>The client should be asked whether he or she wishes to adapt his or her sustainability motivations or look for financial instruments elsewhere.</p> <p>If the client decides to adapt his or her sustainability motivations, a record of that decision should be kept.</p>
<p><b>Outcome 3: No financial product meeting sustainability preferences</b></p>	
<p><i>To be completed by the investment firm:</i></p> <p><b>Q12. I am unable to recommend a financial instrument which meets your sustainability preferences because:</b> </p> <p>.....</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> I have informed the client that a suitable financial instrument which meets the client’s sustainability preferences may be available elsewhere on the market.</li> <li><input type="checkbox"/> I have informed the client of online platforms which compare the sustainability features of different financial instruments<sup>10</sup>.</li> </ul>	<p>The investment firm has an obligation to explain the reasons why no financial product recommendation is possible which meets the client’s sustainability preferences and to keep a record of these reasons. </p>
<p><b>Q13. Considering I cannot recommend a financial instrument to satisfy your sustainability preferences, do you want to adapt your sustainability preferences?</b> </p>	<p>Where no financial instrument meets the client’s sustainability preferences, the client may adapt his or her sustainability preferences. </p>

9 Such as My Fair Money (<https://www.myfairmoney.fr>)  
 10 Such as My Fair Money (<https://www.myfairmoney.fr>)

<p> <input type="checkbox"/> Yes  <input type="checkbox"/> No, prefer to find alternative investment solutions.         </p> <p>If you have answered 'Yes':</p> <p>Sustainability preferences should be adapted in the following manner:</p> <p>.....</p> <p>Reason(s) for adapting the sustainability preferences is/are:</p> <p>.....</p>	<p>The investment firm has an obligation to keep records of the decision and the reasons for that decision.</p> <p>After a client decides to adapt its preferences, <u>and not before</u>, the firm has the possibility to disclose to the client, information about the offering of products with sustainability features.</p> <p>If the client answer Yes to Q13, the financial advisor may proceed to recommend a financial instrument.</p>
<p><i>To be completed by the investment firm:</i></p> <p>Q14. I recommended the following financial instrument(s):</p> <p>.....</p> <p>The recommended financial instrument(s) meet(s) the adapted sustainability preferences because:</p> <p>.....</p>	<p>The investment firm has an obligation to explain why a recommended financial instrument meets the client's sustainability preferences and to provide a report to the client including these reasons. </p>

FUNDER: This project has received funding from the European Union's LIFE program under grant agreement LIFE18IPC/FR/000010 A.F.F.A.P.

DISCLAIMER: This work reflects only the views of 2DII. Other members of the Finance ClimAct Consortium and the European Commission are not responsible for any use that may be made of the information it contains.

The Finance ClimAct project contributes to the implementation of France's National Low Carbon Strategy and the European Union's Sustainable Finance Action Plan. It aims to develop tools, methods and new knowledge that will enable (1) savers to integrate environmental objectives into their investment choices, and (2) financial institutions and their supervisors to integrate climate issues into their decision-making processes and align financial flows with energy and climate objectives.

Finance ClimAct is a first-of-its-kind program with a total budget of €18 million and €10 million in funding from the European Commission.

Duration: 2019-2024
